**Subject:** Re: Microsoft Monopoly

I have been using personal computers for 14 years and have seen Microsoft outmaneuver its opponents in the marketplace. I have seen the use of Fear, Uncertainty and Doubt by Microsoft to excellent advantage. The finding of the court in the settlement were common knowledge 6/7 years ago and much commented on in the computer magazines, at least until Microsoft got control.

I urge you all to hold firm against the bully from Redmond and to pursue the monopoly until it is no more.

Thank you.
